3. Flights from at least 4 different launch sites to at least 3 different landing areas, 1 of these sites must be inland. *Note 3.*			
4. At least 5 take-offs in winds of 5 knots (9 km/hr) or less.			
5. At least 5 take-offs in winds of 9 knots (17km/hr) or more.			

Examinations

Theory Exams	Initials Instructor	Student	Date completed
PG1 theory examination (OPMF23) min 90% correct (completed during first 6 flights).			
PG2 examination (OPMF32) min 90% correct.			
VFR examination (OPMF33) min 90% correct.			

Declarations**Pilot.**

I have maintained an accurate log of my flights (Note: includes details of wing used, date, launch and landing sites, duration, and type of flight or flight training exercises completed). I am aware that a signed copy of this log may be requested by the Chief Executive for verification at any time.

I have completed the flight and theory requirements listed above and agree to comply with the rules of the NZHGPA including any club rules that apply to the sites I intend to fly. I hereby apply for the PG2 pilot certificate issued in accordance with Civil Aviation Rules and the NZHGPA Procedures manual.

Signature.....Date.....

Instructor

I (instructors name)hereby certify that I have confirmed the above named pilot is a full member of the NZHGPA and has completed all the flight and theory test requirements to an acceptable level in accordance with the NZHGPA Procedures manual for the issue of a PG2 paraglider pilot certificate.

Signature.....PIN.....Date.....

When completed send this form to the NZHGPA Administrator with the 3 marked examinations.

Notes:

1. Any combination of up to 10 flights that total 100mins. E.g. 5 x 20 mins, 10 x 10 mins, 4 x 25 mins etc.
2. Authorised sites are those rated PG1 or PG2 by the administering club and must provide enough height and clearance from terrain for continued instruction of the required skills in section A of this certificate
3. The student should experience a range of flying sites and different landing areas. Ensure both thermalling and soaring sites are actively used where possible.
